

Specification of Sodium Carboxymethyl Cellulose

Commodity Name: Sodium Carboxymethyl Cellulose

CAS No.: [9004-32-4]

Synonyms: CMC

HS Code: 39123100

Product Type	Specification Item		Standard
CMC-HV	Viscometer dial reading at 600r/min (mPa.s)	Distilled water	33-40
		4% salt water	33-40
		Saturated salt water	43-48
	Filtrate volume(ml)		≤5.5
	purity		≥98.5%
	D.S.(degree of substitution)		0.8-0.9
	Ph		8-9
	Chloride%		≤1.5

Packing: 25kg Kraft paper bag with PE inner, or other packing as clients request.

Storage:

1. The products should be prevented from water and package bag damaging during transportation
2. Since the date of production, a preservation period should not exceed 2 years for industrial grade product.
